# Arttu Aarnio

arttueino@gmail.com Helsinki, Finland arttu-aarn-io arttuaarnio

## EDUCATION

**Haaga-Helia University of Applied Sciences**

Bachelor of Information Technology, Majoring in Software Development — Aug 2023 - Dec 2026

## WORK EXPERIENCE

**Haaga-Helia Project Course**

Software Developer — Jan 2026 - May 2026

- Worked in a **6-person Scrum team** on a real customer project, translating Figma designs and requirements into a working mobile application with **Finnish/English internationalization**.
- Developed a cross-platform mobile application using **React Native, Expo, and TypeScript-** , implementing features such as authentication, onboarding, team management, session history, and settings.
- Developed backend functionality with **Deno, Hono, TypeScript, and Supabase**, including REST API endpoints, authentication middleware, protected routes, and team/session management.

**Sata Innovations Oy**

Software Developer Trainee — Oct 2025 - Dec 2025

- Planned, designed, and developed an early-stage cross-platform product for iOS, Android, and the web.
- Collaborated with a 3-person team to deliver the initial **MVP** using **Flutter** and **Dart**.
- Contributed to product definition and feature implementation in a fast-paced, early-stage development environment.

**Self-employed**

Freelance Developer — July 2025 - Present

- Developing and maintaining a client website as an independent freelance project.

## PROJECTS

**Personal Portfolio** — July 2025 - August 2025

- Built a responsive portfolio with **React, Vite, TypeScript**.
- Styled using **Tailwind CSS** and **shadcn/ui**.
- Optimized for performance and mobile responsiveness.

**PoolPocket** — April 2025 - May 2025

- Built a cross-platform billiards app with **Expo React Native + TypeScript**..
- Integrated **Google Maps & Places API** for real-time venue discovery.
- Implemented **Firebase Auth + Realtime DB** for secure accounts and data.
- Created an **AI chatbot** with OpenAI's API for rules, strategy, and gear tips.

**MovieMania** — Now 2024 - Feb 2025

- Built a full-stack movie platform with **Spring Boot (Java)** backend and **React + TypeScript** frontend.
- Implemented **JWT authentication** and RESTful APIs for users and movies.
- Integrated **PostgreSQL** for data storage and **TMDb API** for real-time movie info.
